

# **DURA**STRIPE<sup>®</sup> **XTREME**

The most rugged peel-&-stick striping material you can employ.

Recommended for:

- *Rough flooring conditions*
- *Heavy forklift traffic*
- *Challenging and critical environments*

*Xtreme DuraStripe combines a durable, impact resistant skin with an aggressive, conforming adhesive to deliver a striping material that conquers harsh industrial environments. Its specially designed surface layer is engineered to resist damage caused by pivoting and skidding forklift wheels - two of the most common causes of aisle marking destruction. Its beveled edge assists dragged pallets in sliding over the stripe to avoid slicing or tearing.*

The chart below compares Mean Lean and Xtreme to help you choose the best DuraStripe version for your facility and application.

	<u>Mean Lean</u>	<u>Xtreme</u>
Vinyl Thickness	12 mil	19 mil (0,48mm)
Adhesive	(0,2mm) chemical rubber-based	
Beveled edge		Yes
Recommended for heavy fork traffic	No	Yes
Recommended for rough flooring conditions	No	Yes
Opacity	No	High
Easily reconfigurable	Medium	YES
